Workflow Alignment: Suspicious Charge Intake Agent

Why This Matters for Arabica AI: Unrecognized and undue charges account for **24,491 complaints** across the bank (averaging **~678 claims/month**). Over **50.5% of these arrive via Call Center phone queues**, where average hold time is ~2.0 minutes and duration is ~7.2 minutes, with a **56.4% non-resolution rate on first call**. By automating authenticated intake, slot extraction, and transaction evidence matching, Arabica AI directly tackles the **20.0% SLA breach bottleneck** while eliminating hold times.
